PROFESSIONAL SUMMARY

Motivated cybersecurity professional completing an Associate of Science in Cybersecurity with plans to continue into a bachelor's degree program. Bringing nearly 20 years of technical troubleshooting and problem-solving experience into cybersecurity. Experienced in building and administering a personal cybersecurity home lab featuring Wazuh SIEM, Kali Linux, Ubuntu Server, and Metasploitable2 to develop practical skills in vulnerability assessment, incident response, security monitoring, and threat detection. Demonstrated commitment to continuous learning through hands-on projects documented in a professional online portfolio.

TECHNICAL SKILLS

- Security Operations: Security Monitoring, Log Analysis, Alert Triage, Incident Response, MITRE ATT&CK
- Security Tools: Wazuh SIEM, OpenVAS, Wireshark, Nmap, Metasploit
- Operating Systems: Kali Linux, Ubuntu Server, Windows Server, Windows 10/11
- Networking: TCP/IP, DNS, DHCP, Packet Analysis, Network Troubleshooting
- Virtualization: Oracle VirtualBox, Host-Only Networking, NAT Configuration

CYBERSECURITY PROJECTS

Security Operations & Incident Response Lab

- Deployed and administered Wazuh SIEM in a virtualized home lab.
- Investigated SSH authentication failures, privilege escalation events, and security alerts.
- Produced SOC-style incident reports with findings, timelines, and remediation recommendations.
- Mapped activity to MITRE ATT&CK techniques.

Vulnerability Assessment & Remediation

- Performed OpenVAS vulnerability assessments against Windows and Linux systems.

- Analyzed risk severity and documented remediation recommendations.
- Produced professional vulnerability assessment reports.

Cybersecurity Portfolio Website

- Designed and developed a personal cybersecurity portfolio using HTML, CSS, and JavaScript.
- Showcases cybersecurity lab documentation, SOC incident reports, vulnerability assessments, and technical projects.
- Includes downloadable resume, GitHub repositories, and professional contact information.
- SOC case studies, and technical project documentation
- Portfolio: <https://clinton-etienne.github.io>

Metasploitable 2 Security Validation Lab

- Conducted reconnaissance and service enumeration using Nmap.
- Validated vulnerabilities using Metasploit in a controlled environment.
- Documented exploitation methods, impacts, mitigations, and detection opportunities.

EDUCATION

Southern New Hampshire University

Associate of Applied Science in Cybersecurity

Expected Completion: August 2026

GPA: 3.97

Honor Roll (2023–2026)

National Society of Leadership and Success (NSLS)

Alpha Sigma Lambda Honor Society

RELEVANT CYBERSECURITY & TECHNICAL COURSEWORK

- CYB-200 Cybersecurity Foundations
- CYB-250 Cyber Defense
- CYB-260 Legal and Human Factors of Cybersecurity
- CYB-230 Operating System Security
- CYB-240 Application Security
- CYB-210 Computer Networking
- IT-212 Introduction to Computer Networks
- IT-202 Computer Operating Systems
- IT-140 Introduction to Scripting
- IT-145 Foundations in Application Development
- DAD-220 Introduction to Structured Database Environments

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- TryHackMe – Pre Security
- TryHackMe – Introduction to Cybersecurity
- TryHackMe Linux Competency Badge
- TryHackMe Networking Badge
- CompTIA Security+ (Planned)

PROFESSIONAL EXPERIENCE

Aggregate Maintenance Technician | Midwest Concrete Materials | 2024–Present

Troubleshoot mechanical and electrical systems, diagnose failures, maintain documentation, and support safe and reliable operations.

Millwright | R&S Maintenance | 2023–2024

Performed maintenance, troubleshooting, installation, and technical problem-solving across multiple industrial facilities.

Corrections Officer | Pottawatomie County Sheriff's Office | 2009–2011

Maintained security, accountability, documentation, and operational safety in a correctional environment.

Welder III | Caterpillar | 2007–2009

Manufactured heavy equipment components, trained employees, and improved operational processes.
